

Fresh Computer Systems Release Notes - April 2020

Reference	Components	Full Fix	Release Note
DEV-2343	Distribution	20.2.0	A warning popup has been added to Order Form Maintenance when changing the All Active products flag to Y as this will override all current products. A fix has been made to the Department / Category maintenance screen for Fresh Orders.
DEV-2591	Distribution	20.1.0	Previously an error would be shown if the cut-off time was not entered when entering long lead time details.
DEV-2619	Distribution	20.1.0	Performance has been improved when viewing Supplier Document Allocations.
DEV-2622	Distribution	20.1.0	Restrict printing of delivery run schedule description on pick slips.
DEV-2635	Distribution	20.2.0	Bug Fix for entering new bank account
DEV-2686	Distribution	20.2.0	Link to Fresh Release Notes is available through Fresh. In Fresh, Click on Help, then Release Notes
PS-133	Distribution	20.1.0	Custom product descriptions now support many-to-one mappings so that multiple third-party product codes can map to a single Fresh product code.
PS-143	Distribution	20.2.0	Standard pricing (Area Price) can now be updated via an XML interface.
PS-145	Distribution	20.1.0	Cancellation Picking Slips are now printed for Cancelled DC Transfers
PS-151	Distribution	20.2.0	The System Configuration setting to Print a Delivery Note with the Invoice can now be overridden at the Customer DC level in Customer Delivery Maintenance.
PS-152	Distribution	20.2.0	The Fumigation Certificate Number has been added to the PHAC - Attachment List report.
DEV-2541	EDI	20.1.0	The Interface Logs screen (usually 03C) has been enhanced to show some file contents or API payloads in a popup window, allowing for very large messages to be displayed. A scrollbar has also been added to this screen and the interface description is now searchable.
DEV-2661	Fresh Tracker	20.2.0	A bug has been fixed in Fresh Tracker which caused the delivery quantities to double or triple under some circumstances.
DEV-2663	Fresh Tracker	20.2.0	Fresh Tracker - Fix issue with delivery runs when allocating sale lines over more than one lot
PS-154	Fresh Tracker	20.2.0	Fresh Tracker can now optionally show tomorrow's orders in the App after a specified time of the day. For example, after 9pm, the App can be configured to show tomorrow's orders as well as today's allowing for tomorrow's deliveries to commence before midnight.
DEV-2347	Insights	20.2.0	The available decimal number format masks have been updated in Fresh Insights.
PS-149	Insights	20.2.0	General Ledger Period Summary Classifications Domain added.
DEV-2533	Market Agent	20.0.1	Performance has been improved when the Sales Summary Report deals with Unreconciled Customer Document Charges.
DEV-2568	Market Agent	20.1.0	Fixed an issue where the GST Amount sometimes did not print when required.
DEV-2631	Market Agent	20.1.0	Format improvements on Purchase Order.
DEV-2632	Market Agent	20.1.0	Fix to allow Grower Remittance be output in XLS format.
DEV-2651	Market Agent	20.1.0	Count size code added to batch pick slips.
DEV-2659	Market Agent	20.2.0	Fixed an issue with Grower Remittances where levies with the same description would not always group together correctly.
DEV-2689	Market Agent	20.2.0	Fixed an issue where Balance Sheets run using the New Financial Statements would fail if the System Configuration Profit GL Account was not setup.
DEV-2690	Market Agent	20.2.0	Delivery Note Layout updated
PS-150	Market Agent	20.2.0	Printing Stock Transfer Orders in Stock Transfer Order Entry now uses the Destination Selection Popup.
OPS-1298	Market Agent	20.2.0	Improvements to Formatting on Grower Returns.
